

Estonian Business Delegation Business Hub opening and networking event in Riga on May 26, 2025

Dipperfox OÜ

Web page www.dipperfox.com

Dipperfox is Estonian based company that has developed unique stump removal machine that removes the stumps efficiently and in environment friendly way.

Sector of interest: Forestry/plantations, agriculture, construction, companies that take care of the public parks and the city environment

Products/Services:

Dipperfox stump grinder has a different design as other stump removal machines. Dipperfox is slow speed but high torque stump drill. It has a slow speed engine that produces enormous amounts of torque. This will enable to remove the stump and also the roots that are in the ground.

Slow speed cutting head will withstand rocky and also soft but abrasive ground conditions, as well as hidden rocks inside the stumps themselves allows to solve the problem that faces the stump removal without the need to dig out the whole stump.

Siidrikoda OÜ

Website: kodas.ee and eatfibes.com

Production of ciders and fruit purees.

Our goal is to find cooperation partners in the Latvian business landscape who would be interested in representing us and marketing our products (www.eatfibes.com) on the Latvian market. We have already established logistics through an online store to deliver our Fibes products to end consumers in Latvia. However, we would like to find B2B contacts (private clinics, gyms, companies) who value healthy food, are familiar with the microbiome topic, and are capable of effectively marketing scientifically-backed products with health benefits.

Nefab Packaging OÜ

<https://www.nefab.com/>

Nefab is a global provider of industrial packaging, logistics and digital services.

We save environmental and financial resources by optimizing supply chains. It's about innovating together to create smarter packaging and logistics solutions while always respecting people and ethical standards. This contributes to a better tomorrow for our customers, for society and for the environment.

- We are located in over 38 countries worldwide
- We have approximately 4900 employees
- We have 250 engineers worldwide

Nefab in Baltics was established in 2001 and is active in all Baltic markets, supporting industry customers with packaging solutions.

SK ID Solutions

<https://www.skidsolutions.eu/>

SK ID Solutions specializes in international e-identity solutions.

Our strong authentication solutions enable users to securely use e-services and give legally binding electronic signatures. We partner with the Estonian state in issuing certificates for national identity documents and maintaining the infrastructure necessary for using different digital identities.

For 20 years, we have been the backbone of Estonian digital society enabling digital signing and authentication. In the beginning of 2017, we launched Smart-ID — a popular personal identification solution in the Baltics. With offices in Estonia, Latvia, and Lithuania, we provide services more than 1000 businesses and 4 million end-users in the Baltics.
